The Government of India has issued the new consolidated Foreign Direct Investment policy in May, 2015 (FDI Policy) bringing forth significant changes to the erstwhile foreign direct investment policy and paving the way for large overseas investments in sectors such as multi-brand retail and telecom. The Seminar seeks to lend a perspective on the magnitude of complexities involved in the interpretation of the Foreign Exchange Management Act, 1999 (FEMA) with special emphasis on capital and current transactions, inbound and outbound investments, acquisition of immoveable property and external commercial borrowings amongst others. Our endeavor is that the Seminar help our esteemed audience to keep pace with the ever evolving exchange control regime.

The Seminar is intended for companies, exporters, importers, professionals, potential investors, trusts, bankers and other finance professionals who deal with foreign exchange transactions. Interested individuals and corporates are welcome to attend the Seminar and hear the experts from Lakshmikumaran & Sridharan.
